

Calibrating the backgauge on the Ideal 7228-95 EC3 and Ideal EP versions

1. Press "start" button. The backgauge moves to it's "Set" position. Move the backgauge to a middle position.
2. Press and hold switch "mm/inch", then press and hold the reverse button. Release switch mm/inch, then release reverse button. The memory of the machine is completely cleared and only the basic size 72,00 cm will come up, when the start button is pressed.
3. Move the backgauge forwards to a size near 20 cm. Cut a pile of paper and measure the paper.
4. Press and hold switch "mm/inch", then press and hold button number "9". Release switch "mm/inch", then release button number "9". The display is blinking. Enter correct size. Press and hold switch "mm/inch", then press and hold button number "9". Release switch "mm/inch", then release button number "9". The machine is now adjusted electronically to the correct size.
5. Cut paper again and measure it, to confirm that size is correct.

Important: Press and hold switch "mm/inch" correctly, otherwise the display changes from metric to inch.

Measurement in metric is two-digit	72.00 cm
Measurement in Inch is three place	28.347"
